MY GOAL

Full-stack software engineer and consultant with experience delivering scalable business applications and modernizing legacy systems in regulated environments. I currently work on transforming a legacy banking platform by integrating old and new services, focusing on robust API design and compliant HTTP/REST/SOAP behavior.

My goal is to grow into a strong end-to-end engineer who can take ownership of complex integrations and backend architecture, while also contributing to front-end development to deliver cohesive, user-focused solutions. I thrive in collaborative teams, enjoy translating business needs into reliable technical solutions, and I'm motivated by building systems that are maintainable, secure, and production-ready.

SKILLS

Programming Languages: C, C++, Python, Java.

Back-End: PostgreSQL, FastApi, MySQL, Spring Boot.

Front-End: Bootstrap, HTML, CSS, React, React Native, NextJS, Tailwind, JavaScript, Typescript.

EXPERIENCE

Consultant - Full time September 2025 - Present
Netcompany, Copenhagen

- Consulting role within the financial services domain, working on the modernization of a legacy banking platform and its integration with new services.
- Designed and implemented integration layers between legacy and modern systems, ensuring compliant HTTP/REST/SOAP principles (correct status codes, idempotency, headers, timeouts, retries, error handling, and backward compatibility).
- Collaborated cross-functionally with architects, developers, testers, and client stakeholders to align technical solutions with business requirements and regulatory/compliance needs.

Fullstack Software Engineer - Part time June 2023 - Present
TellusTalk AB, Remote

- Responsible for developing and maintaining a communications application aimed at businesses. By collaborating with a team of students, I have contributed to creating high-performing, scalable solutions by leveraging my knowledge in both front-end and back-end development.

Teaching Assistant January 2023 - June 2023
Umeå University, Umeå

- As a teaching assistant, it is my duty to carefully review and correctly grade exams and projects carried out by students and to provide constructive feedback to support their learning and academic growth.

IT Manager
ProBits, Umeå

November 2022 - March 2023

- I successfully designed and developed a new website for the company, then worked towards its future implementation.
- Was responsible for providing technical assistance to customers using the application, ensuring a smooth and efficient user experience.
- Was tasked to implement updates and modifications to the mobile application to enhance its functionality, improve user experience, and adapt to changing market and business requirements.

Customer Service
Vattenfall, Umeå

March 2018 - September 2020

- As a customer service representative, I was responsible for assisting customers with queries regarding billing, electricity contracts, relocation, and general information.
- I also had the responsibility to troubleshoot the company's internal system and handle any errors that would occur with its general usage.

EDUCATION

Bachelor's Degree in Computer Science
Umeå University

2021 - 2025

**FLUENT
LANGUAGES**

- English
- Swedish
